## Resolution Information

### Resolution

Resolve that all report presentations from the AARC, Executive Office, and House of Delegate leaders be presented live, in person, not virtually or prerecorded with the exception in times of illness or family emergency.

### Executive Summary

Never in the history of the organization has reports been presented virtually or prerecorded until Covid. Live in person reports allows the ability for questions from the floor and discussion, even sometimes allowing a minute one on one outside the room with the presenter.

It would also, be more favorable to have AARC/Executive Staff present reports just prior to a break time to allow for mingling following the reports.

### Desired Outcome

Reports presented in person are more personable and allows for questions and discussion. It also shows, the speaker is conveying interest in the audience (members, students, etc.).

The use of PowerPoint assistance with in person reporting is satisfactory.

### Strengths

In person reporting seems more friendly, prompts more interest, participation, and better attention.

### Problems

There should be only positive effects with no problems.

### Opportunities

For leaders to better connect with the audience.

### Barriers

None

## Impact
